

The Adjusted Chiropractic Health Tip of the Day

The Silent Miracle

Within each and everyone of us is the potential for inner healing. Wellness Chiropractic is based on simple wellness laws. First, the body is a self healing organism and has the ability to heal itself as long as there is no interference. Second, the brain and spinal cord control the function of every cell, tissue and organ in our body. Third, vertebral subluxations interfere with the function and expression of our body through the nervous system. Fourth, a specific chiropractic wellness adjustment removes the interference and allows the body to heal itself from within. It seems like a miracle when the millions of people who have enjoyed chiropractic care experience health and healing again when no hope was given.

Chiropractic has given the sight back to the blind and life back to the lifeless. The healing power of the body is so incredible that miracles happen when subluxations are removed. Imagine the power that is turned on when your subluxations are removed. Imagine the diseases that are prevented or averted as a result of the chiropractic adjustment! This is what we call the "Silent Miracle."
